

SAI CHARAN TUMPURI

DevOps & System Design Engineer

post2saicharan@gmail.com | +91 9390144066 | Chennai, India | GitHub | LinkedIn

SUMMARY

DevOps / SRE engineer with 3+ years designing, deploying, and scaling high-availability cloud systems for GCP-based platforms serving 20+ engineering teams at Sky (Comcast). Strong background in Kubernetes (GKE, EKS), Docker, Terraform IaC at scale (300+ VMs), CI/CD (Jenkins, GitHub Actions, Cloud Build, ArgoCD), and observability with Prometheus/Grafana and OpenTelemetry. Experienced in Linux administration, networking (DNS/HTTP/TLS), security hardening, and cost-efficient infrastructure design. Built "skyform," an internal IaC self-service platform that removed CI/CD bottlenecks and cut infra ticket resolution by 60%. AWS SAA certified; GCP Professional Cloud Architect.

TECHNICAL SKILLS

Cloud & Infra (AWS/GCP/Azure): GCP, AWS; multi-cloud IaC design and cost optimization

Containers & Kubernetes: Docker, GKE, EKS, Helm, Kustomize, HPA/VPA, Workload Identity, RBAC, Ingress

IaC & Config Management: Terraform (modules, remote state, workspaces), Ansible, Packer / golden-image tooling

CI/CD & GitOps: Jenkins, GitHub Actions, Cloud Build, ArgoCD, Git

Observability: Prometheus, Grafana, Google Cloud Monitoring, OpenTelemetry, incident response & RCA

Systems & Networking: Linux administration, Shell/Bash scripting, DNS/HTTP/TLS, IAM, Secret Manager, security hardening, CVE/vulnerability remediation

Reliability & Performance: Checkov/tfsec, SBOM/vuln scanning, InfraCost, load & capacity planning, disaster recovery, high availability

Languages: Python, Bash, Groovy, SQL, Golang

Data Platform: BigQuery, Dataflow, Airflow/Composer

PROFESSIONAL EXPERIENCE

DevOps Engineer 2 — Comcast (Sky)

Mar 2024 – Present

Chennai, India

- Designed and maintained Kubernetes-native CI/CD on GKE with ephemeral pod agents (Groovy + Python DSL) across 20+ pipelines in staging and production, reducing idle compute by 30% and integrating E2E testing, artifact promotion, and vulnerability scanning.
- Built "skyform," an internal Terraform abstraction with project-isolated remote state, enabling engineers to self-serve GCP infra (BigQuery, GKE, Dataflow); cut infra ticket resolution time by 60% and unblocked 20+ downstream data pipelines.
- Migrated legacy Dataflow and batch workloads to GKE-native deployments using Helm and HPA, standardizing chart templates across teams, improving cluster utilization, and reducing job runtime by 25%; introduced resource requests/limits governance to eliminate noisy-neighbor incidents.
- Owned OS/security lifecycle for cloud infrastructure: built and rebuilt GCP golden images with Packer to remediate CVEs, led migration of 300+ GCP VMs from CentOS 7 (EOL) to CentOS 9 with zero SLA breaches, and decommissioned 40+ underutilized VMs via heap-dump analysis to cut cost and CVE exposure.

DevOps Engineer 1 — Comcast (Sky)

Jun 2023 – Mar 2024

Chennai, India

- Designed and provisioned scalable, secure GCP infrastructure (VMs, IAM, BigQuery, GCS, VPC, networking) using Terraform + Ansible, delivering zero-touch deployments via Cloud Build CI/CD and cutting deployment time by 60%.
- Integrated InfraCost into GitHub PR checks for automated cost visibility on IaC changes, enabling proactive budget forecasting and preventing surprise spend on merges.
- Rebuilt 30+ legacy projects and decommissioned obsolete VMs, producing full runbooks and documentation to support incident response and offshore knowledge transfer.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (Sep 2025) | [Badge](#)
- GCP Professional Cloud Architect (Feb 2026) | [Badge](#)

EDUCATION

SASTRA University — B.Tech, Electronics & Communication Engineering

Jul 2019 – Jun 2023 | GPA: 7.93
