

SAI CHARAN TUMPURI

DevOps / Site Reliability Engineer

post2saicharan@gmail.com | +91 9390144066 | Chennai, India | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Cloud DevOps/SRE engineer with 3+ years automating and scaling cloud infrastructure on GCP and AWS for 20+ teams at Sky (Comcast). Hands-on with Kubernetes (GKE/EKS), Terraform IaC at scale (300+ VMs), Linux and networking, and CI/CD across Jenkins, GitHub Actions, Cloud Build, and ArgoCD. Handle on-call incident response and SLO-driven observability. Built “skyform,” an internal IaC self-service platform that cut infra ticket resolution time by 60%. AWS Solutions Architect – Associate and GCP Professional Cloud Architect certified.

TECHNICAL SKILLS

Cloud: GCP, AWS

Systems & Networking: Linux, TCP/IP networking, DNS, load balancing, VPC

Containers & Orchestration: Kubernetes (GKE, EKS), Docker, Helm

Infrastructure as Code: Terraform, Ansible, Packer

CI/CD & GitOps: Jenkins, GitHub Actions, Cloud Build, ArgoCD

Observability & Incident Response: Prometheus, Grafana, Cloud Monitoring, OpenTelemetry, distributed tracing, logging, on-call, SLO/SLA, postmortems

Languages: Python, Go, Bash, Groovy, SQL

Data Platform: BigQuery, Dataflow(Apache Beam), Airflow/Composer

PROFESSIONAL EXPERIENCE

DevOps Engineer II — Comcast

Mar 2024 – Present

Chennai, India

- Designed and operated Kubernetes-native CI/CD on GKE with ephemeral pod agents (Groovy + Python DSL) across 20+ pipelines, cutting idle compute by 30% and integrating E2E tests, artifact promotion, and vulnerability scans.
- Built “skyform,” an internal Terraform abstraction with project-isolated remote state that lets engineers self-serve GCP infra (BigQuery, GKE, Dataflow); reduced infra ticket resolution time by 60% and unblocked 20+ data pipelines.
- Migrated legacy Dataflow and batch workloads to GKE using Helm and HPA, standardized chart templates, and drove capacity planning and scalability improvements by enforcing resource requests/limits — reducing job runtime by 25%.
- Owned OS and security lifecycle: rebuilt GCP golden images with Packer, led migration of 300+ VMs from CentOS 7 to CentOS 9 with zero SLA breaches, and decommissioned 40+ underutilized VMs to cut cost and CVE exposure.

DevOps Engineer I — Comcast

Jun 2023 – Mar 2024

Chennai, India

- Provisioned secure GCP infrastructure (VMs, IAM, BigQuery, GCS, VPC networking) using Terraform and Ansible with zero-touch Cloud Build CI/CD, cutting deployment time by 60%.
- Integrated InfraCost into GitHub PR checks for automated cost visibility on IaC changes, enabling proactive budget forecasting.
- Rebuilt 30+ legacy projects and decommissioned obsolete VMs; authored runbooks to support incident response and offshore knowledge transfer.
- Owned incident management for 300+ production Linux VMs on on-call rotation, monitoring CPU, memory, and 5xx alerts via Cloud Monitoring and Grafana; resolved P1–P4 incidents against SLOs and authored postmortems to drive toil reduction.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (Sep 2025) | [Badge](#)
- Google Cloud Professional Cloud Architect (Feb 2026) | [Badge](#)

EDUCATION

SASTRA University — B.Tech, Electronics & Communication Engineering

Jul 2019 – Jun 2023 | GPA: 7.93
