

SAI CHARAN TUMPURI

DevOps / Site Reliability Engineer

post2saicharan@gmail.com | +91 9390144066 | Chennai, India | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Platform/DevOps engineer with 3+ years designing and automating scalable cloud infrastructure on GCP and AWS across Linux-based, hybrid environments for 20+ teams at Sky (Comcast). Hands-on with Linux system administration, shell scripting, Terraform and Ansible, Kubernetes (GKE/EKS), Docker, and CI/CD across Jenkins, GitHub Actions, Cloud Build, and ArgoCD. Own on-call incident response, monitoring, logging, and security lifecycle tasks including access controls and vulnerability management. Built skyform, an internal IaC self-service platform that cut infra ticket resolution time by 60%. AWS Solutions Architect - Associate and GCP Professional Cloud Architect certified.

TECHNICAL SKILLS

Cloud: GCP, AWS

Systems & Networking: Linux system administration, shell scripting, TCP/IP networking, DNS, load balancing, VPC, hybrid cloud

Containers & Orchestration: Kubernetes (GKE, EKS), Docker, Helm

Infrastructure as Code: Terraform, Ansible, Packer, configuration management, environment setup

CI/CD & GitOps: Jenkins, GitHub Actions, Cloud Build, ArgoCD, GitLab CI/CD

Observability & Incident Response: Prometheus, Grafana, Cloud Monitoring, OpenTelemetry, distributed tracing, logging, log pipelines, on-call, SLO/SLA, postmortems, Incident Response

Languages: Python, Go, Bash, Groovy, SQL

Data Platform: BigQuery, Dataflow (Apache Beam), Airflow/Composer

Security: IAM, access controls, encryption, vulnerability management

PROFESSIONAL EXPERIENCE

DevOps Engineer II - Comcast Mar 2024 - Present

Chennai, India

- Built skyform, an internal Terraform abstraction with project-isolated remote state that lets engineers self-serve GCP infra (BigQuery, GKE, Dataflow); reduced infra ticket resolution time by 60% and unblocked 20+ data pipelines.
- Migrated legacy Dataflow and batch workloads to GKE using Helm and HPA, standardized chart templates, and drove capacity planning, scalability, and high availability improvements by enforcing resource requests/limits - reducing job runtime by 25%.
- Designed and operated Kubernetes-native CI/CD on GKE with ephemeral pod agents (Groovy + Python DSL) across 20+ pipelines, cutting idle compute by 30% and integrating E2E tests, artifact promotion, and vulnerability scans.
- Owned OS and security lifecycle: rebuilt GCP golden images with Packer, led migration of 300+ VMs from CentOS 7 to CentOS 9 with zero SLA breaches, and decommissioned 40+ underutilized VMs to cut cost and CVE exposure.

DevOps Engineer I - Comcast Jun 2023 - Mar 2024

Chennai, India

- Provisioned secure GCP infrastructure (VMs, IAM, BigQuery, GCS, VPC networking) using Terraform and Ansible with zero-touch Cloud Build CI/CD, supporting Linux-based environment setup and shell-scripted automation while cutting deployment time by 60%.
- Rebuilt 30+ legacy projects and decommissioned obsolete VMs; authored runbooks for configuration management, environment setup, and incident response.
- Owned incident management for 300+ production Linux VMs on on-call rotation, monitoring CPU, memory, and 5xx alerts via Cloud Monitoring and Grafana; resolved P1-P4 incidents against SLOs and authored postmortems to drive toil reduction.
- Integrated InfraCost into GitHub PR checks for automated cost visibility on IaC changes, enabling proactive budget forecasting.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (Sep 2025) | [Badge](#)
- Google Cloud Professional Cloud Architect (Feb 2026) | [Badge](#)

EDUCATION

SASTRA University - B.Tech, Electronics & Communication Engineering

Jul 2019 - Jun 2023 | GPA: 7.93
